Author Index

Amyotte, P. R., 87–94

Benuzzi, A., 128–134
Bais, A. F., 155–160, 194–199
Bagster, D. F., 224–234
Boykin, R. F., 108–113
Britton, L. G., 161–170

Chidambaram, M., 95–101, 171–175
Chippett, S., 161–170

Daous, M. A., 50–53
Davis, B. C., 224–234
Deaves, D. M., 39–44

Epstein, M., 45–49

Fauske, H. K., 45–49
Fisher, H. G., 78–86

Gopalan, M. N., 95–101, 171–175
Grewer, T., 215–223

Hasegawa, K., 135–144
Hauser, G. M., 45–49
Heemskerk, A. H., 239
Hirata, Y., 135–144
Horner, R. A., 123–125

Jann, P., 33–38
Jefri, M. A., 50–53

Kakko, R., 102–107
Khadke, H. Y., 171–175
Klusacek, H., 215–225
Kletz, T., 117, 182, 243
Kondo, K., 135–144
Kotoyori, T., 16–21
Kottowski, H., 128–134
Kumar, D. S. S. S., 95–101

Leung, J. C., 78–86
Levary, R. R., 108–113
Livingstone, J. G., 126–127
Löffler, U., 215–225
Lunn, G. A., 200–208

Massobrio, C., 235–239
Matteo, C., 145–154

Naba, H., 135–144
Nasrallah, M., 145–154
Nolan, P. F., 3–4

Pegg, M. J., 87–94
Petersen, S., 53–55
Piccinini, N., 235–239
Pritchard, D. K., 187–193

Rasmussen, B., 240
Rich, S. H., 145–154
Rogers, R. L., 215–225
Rouhiainen, V., 67–77

Sato, K., 209–214
Scarrone, M., 235–239
Steinbeck, J., 215–225
Suokas, J., 67–77
Swift, I., 5–15

Tweeddale, M., 241

Venkatasubramanian, V., 145–154
Versino, B., 128–134

Woodward, J. L., 22–32, 176–178

Zaldivar, J. M., 128–134
Zerefos, C. S., 155–160, 194–199
Ziomas, I. C., 155–160, 194–199

Subject Index

Acceptable risk
Storage area, Transport emergency planning, 53–55
Accident
Vapour cloud explosion, Blast wave, 187, 193
Analysis
Risk assessment, Safety performance, 67–77

Blast wave
Vapour cloud explosion, Accident, 187–193
Book reviews
Friedel, L., 242
Gibson, N., 242
Grossel, S. S., 56–59, 116, 241
Kletz, T., 115
McQuaid, J., 58
Rasmussen, B., 179
Schwab, R. F., 180
Sriram. M., 116
Tombs, S., 56, 114,
Urben, P. G., 55
Whitehouse, H., 181

Comment
Horner, R. A., 123–125
Livingstone, J. G., 126–127
Nolan, P. F., 3–4
Conference reports
Heemskerk, A. H., 239–240
Rasmussen, B., 240
Tweeddale, M., 241
Continuous release
Dispersion, Modelling, 155–160, 194–199
Control systems
Explosion, Process choice, 16–21
Hazard, Risk, 128–134
Correspondence
Kletz, T., 117, 182, 243

Deflagration
Modelling, Dust, 161–170
Vents, Design principles, 5–15
Design principles
Deflagration, Vents, 5–15
Wind speed, Steam curtain, 209–214
Dispersion
Gas, Modelling, 39–44
Modelling, Continuous release, 155–160, 194–199
Modelling, Release, 22–32
Dust
Deflagration, Modelling, 161–170
Explosions, Pressure vessels, 87–94

Expert systems
Fault administration, Process flexibility, 145–154
Explosion
Control systems, Process choice, 16–21
Vents, Regression analysis, 200–208
Explosions
Pressure vessels, Dust, 87–94
Exposure
Human factors, Modelling, 50–53

Fault administration
Process flexibility, Expert systems, 145–154
Fault tree method
Reliability, Hazard, 95–101
Vents, Storage Areas, 45–49
Flashing flow
Vents, Two-phase flow, 78–86

Gas
Dispersion, Modelling, 39–44
Maintenance, Reliability, 235–239

Hazard
Control systems, Risk, 128–134
Modelling, Oxidizing materials, 135–144
Reliability, Fault tree methods, 95–101
Safety performance, Transport emergency planning, 176–178
Toxic, Process choice, 215–223
Vapour cloud explosion, Modelling, 102–107
Human factors
Modelling, Exposure, 50–53

Jet flame
View factor, Thermal radiator, 224–234

Literature survey
Grossel, S. S., 181
Loss prevention
Safety case, Process choice, 3–4

Maintenance
Gas, Reliability, 235–239
Modelling
Deflagration, Dust, 161–170
Dispersion, Continuous release, 155–160, 194–199
Dispersion, Release, 22–32
Gas, Dispersion, 39–44
Hazard, Oxidizing material, 135–144
Human factors, Exposure, 50–53
Risk, Storage areas, 108–113
Vapour cloud explosion, Hazard, 102–107

Oxidizing material
Hazard, Modelling, 135–144

Personal safety
Release, Siting, 33–38
Pressure vessels
Explosions, Dust, 87–94
Process choice
Explosion, Control systems, 16
Hazard, Toxic, 215–223
Reliability, Process flexibility, 171–175
Safety case, Legislation, 123–125
Safety case, Loss prevention, 3–4
Process flexibility
Fault administration, Expert systems, 145–154
Reliability, Process choice, 171–175

Regression analysis
Explosion, Vents, 200–208
Release
Dispersion, Modelling, 22–32
Siting, Personal Safety, 33–38
Reliability
Gas, Maintenance, 235–239
Hazard, Fault tree methods, 95–101
Process choice, Process flexibility, 171–175
Risk
Hazard , Control systems, 128–134
Storage areas, Modelling, 108–113
Risk assessment
Safety performance, Analysis, 67–77

Safety case
Loss prevention, Process choice, 3–4
Process choice, Legislation, 123–125
Safety performance
Hazard, Transport emergency planning, 176–178
Risk assessment, Analysis, 67–77
Siting
Release, Personal safety, 33–38
Steam curtain
Design principles, Wind speed, 209–214
Storage areas
Acceptable risk, Transport emergency planning, 53–55
Risk, Modelling, 108–113
Vents, Fire, 45–49

Thermal radiator
Jet flame, View factor, 224–234
Toxic
Hazard, Process choice, 215–223
Transport emergency planning
Acceptable risk, Storage areas, 53–55
Safety performance, Hazard, 176–178
Two-phase flow
Vents, Flashing flow, 78–86

Vapour cloud explosion
Blast wave, Accident, 187–193
Modelling, Hazard, 102–107
Vents
Deflagration, Design principles, 5–15
Explosion, Regression analysis, 200–208
Fire, Storage areas, 45–49
Flashing flow, Two phase flow, 78–86
View factor
Thermal radiator, Jet flame, 224–234

Wind speed
Design principles, Steam curtain, 209–214
